

# Degrees of Reading Power® Literacy Assessment System

## How do you ensure your students can comprehend their textbook content — regardless of the subject?

Identifying the reading abilities of students in your district is critical to student success. Our *Degrees of Reading Power* (DRP) literacy assessment system helps educators understand each student's reading comprehension skills by directly measuring standard number 10 of the Common Core State Standards. Results from DRP, along with an array of reports and online tools, help teachers of any subject select texts that will challenge — but not frustrate — their students.

## The Degrees of Reading Power comprehensive assessment system:

- **Pinpoints the exact level** of each student's individual reading comprehension skills.
- Offers a **clear and precise trajectory of student progress** toward college or career readiness specifically aligned with Common Core State Standards.
- Measures student reading comprehension and text complexity — with both scores on the same scale — **enabling educators to individualize instruction** for each student at the right level of reading difficulty.

*Degrees of Reading Power* offers individualized instruction solutions so that every student is getting the help he or she needs to progress to the next level of reading comprehension by:

- Serving as a **universal screener** that helps teachers screen students for placement, and scaffold classroom instruction based on varying student abilities.
- Delivering a long-term **growth monitor** that measures literacy growth year after year. DRP test scores are tracked for each individual student over multiple test administrations so you can see your students' progress over time.
- Acting as a **benchmark tool** to deliver scores on a numbered scale, with scores that correlate through our BookLink tool to over 38,000 texts of varying difficulty so your students will always have reading options perfect for their current literacy skills.
- Enabling educators to perform effective **curriculum analysis** to determine efficacy of reading programs and deliver timely interventions by always having a clear picture of which students are performing at or above grade level — and who needs extra help.
